

LUCERNA NEWSLETTER

Welcome to our new e-newsletter! We hope you like the new format and new ways in which we would be sharing with you important news and exciting pieces of information.

WHAT'S NEW

- We have made some changes in Lucerna's Operational Manual, Quick Start guide and IFU (Instructions for Use), you can access the latest version of these documents in our website (www.viaxdental.com/lucerna).
- We have received ISO 13485 quality certification for medical devices. This means that our products, both dental restorations and Lucerna, have been put to the test and currently possess a seal of international quality.
- Curved debridement tips will be available for sell starting in December.

IMPORTANT REMINDERS

- It is of extreme importance to make sure that the fiber optic cable is properly attached to the Lucerna unit before initiating any procedure.
- Fiber Optic Cables, both the Lucerna handpiece cable and the whitening cable, are very delicate; therefore they need to be handled with care in order to avoid breakage.

Multifunctional Diode Laser
